

Gauge	12/14G
Knitting Width	52inch
Knitting speed	Maximum speed 1.4 meters per second,32 segment programmable speed
Stitch density	32 segments of electronic control,the use of subdivision technology,adjustable range:0-650,more accurate control of the length of fabric.
Knitting system	Single carriage/Single system
Rib transfer	Both front and back,not affecting by the carriage direction,separtely knitting
Selector	8 section of electronic needle selector
Comb device	Using closed type compound needle with releasing principle,can effectively realize yarn hanging and releasing function
Roller device	Main roller and the comb;the 32 section of automatic control ,subsection adjustment
Color changing device	The 2*6 yarn carriers on each side of 3 guide rails
Protection	Automatic stopping device if yarn broken,yarn knot,batching,stiking,completion,overload,designated starting and stopping,program error happen
Driving system	Belt drive,AC servo control

Safety device

The whole machine cover to reduce noise and dust,the protecting cover is equipped with stopping sensor,emergency stopping,power off device

Data input

Through the U disk,computer connection for direct input of data

Language choice

Multi language version:support Chinese,English,Arabia and other language,meanwhile according to customer's needs and the required language

Size and Weight

Size:L*WW*H 2530*850*1870mm Weight:1000kg
